GLOBAL CHALLENGE

## INTRODUCTION

Formula Regional Global Challenge aims to combine the European and Asian regional championships under the same umbrella. The series will remain as two independent series which will run at different times during the calendar year, but drivers who join both series will score points towards a “Global Challenge” ranking, and the winner will receive a high value prize.

- **The Formula 3 Asian Championship** certified by FIA will run during the traditional European winter season from **January-February**. **Formula Regional Europe** will run between **April to October**.
- Calendar for both racing series' will be planned so that it will allow sufficient time to move the cars between Europe and Asia (and vice-versa) using **sea-freight to minimize cost**. Incentive for Asian teams to join the European series by providing **logistical support** to bring cars from Asia to Europe.
- The goal is for both series to have **the same technical suppliers** to ensure a level playing field and transferability between the two series.
